DIRECTORY

Chapter One: Overview

I System Overview

1.1 Introduction

Embest SOC8200 is a highly-integrated single board computer with PC104 form factor. It employs TI's high-performance AM3517 microcontroller which is based on 600Mhz ARM Cortex-A8 Core with NEON SIMD Coprocessor and POWERVR SGX™ Graphics Accelerator and offers video, image, and graphics processing capable of supporting single board computers, home and industrial automation, and digital signage.

Chapter Two Hardware System

II System Overview

2.1 Single Board Computer

The SOC8200 board has onboard 256MB DDR2 SDRAM, 256MB Nand Flash and 4MB Nor Flash and extends various functions through pins including serial port, Ethernet, CAN, RS485, SD/MMC card, CF card, Audio In/Out, Camera, LCD, USB Host, USB Device, expansion connector and JTAG. Embest has designed an expansion board and function interface boards for the SOC8200. It would be convenient for customer to use the SOC8200 with the expansion board for evaluating the functionality of Texas Instruments' Sitara AM3517 microprocessor. And in the later period customer can add functions through function interface boards according to their own requirements which can effectively shorten the period of research and development of products and speed up time to market.

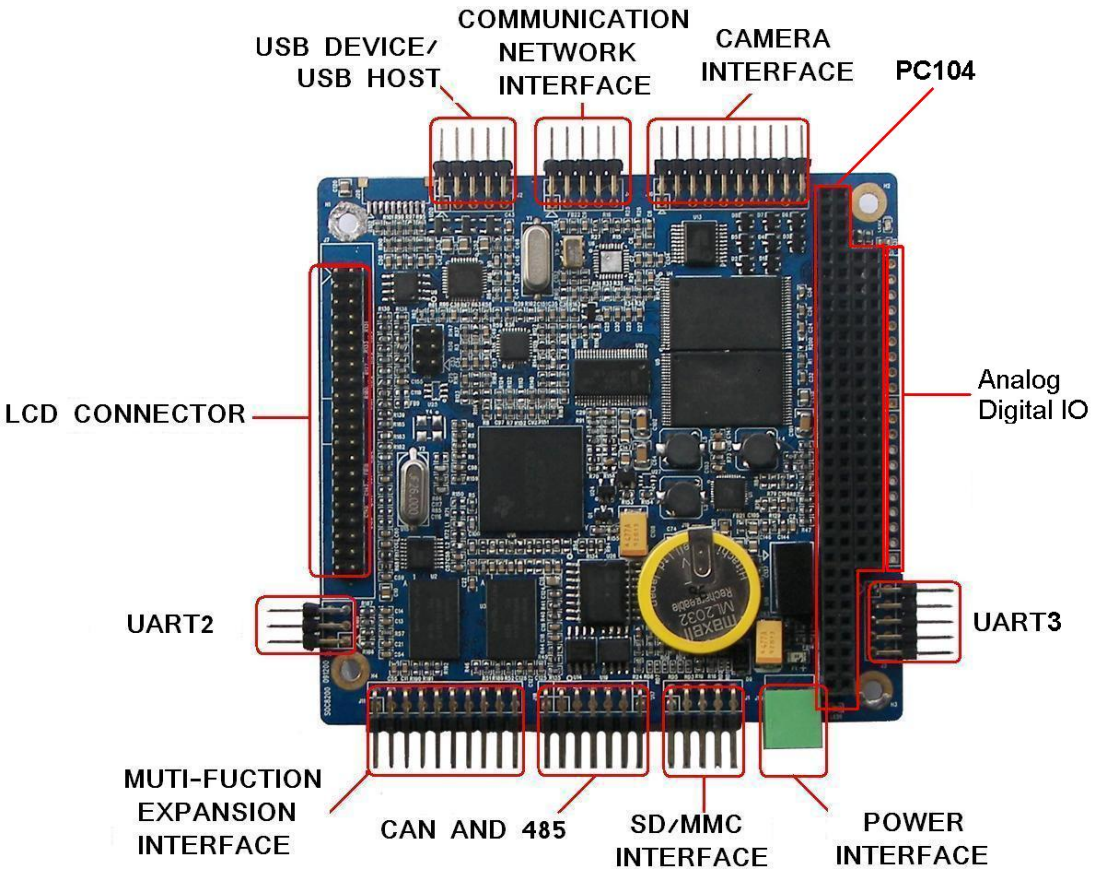

Fig2-1 SOC8200 Connection Diagram

2.2 Hareware Features

Processor

- AM3517 industrial applications processors
- NEON SIMD Coprocessor
- 600MHz ARM Cortex-A8 Core
- POWERVR SGX Graphics Accelerator (AM3517 only)
- 16KB I-Cache, 16KB D-Cache, 256KB L2-Cache, 112KB ROM, 64KB Share SRAM

Memory

- 256MB DDR2 SDRAM, 32bit
- 256MB NAND Flash, 8bit
- 4MB NOR Flash, 16bit (driver has not provided at present)

Signals Routed to Pins

- One 5-wire Debug serial port (RS232)
- One 5-wire serial port (TTL)
- Two USB 2.0 Host High-speed ports, 480Mbps
- One USB 2.0 Device High-speed port, 480Mbps
- One channel Audio input
- Two channel Audio output
- 16-bit LCD output
- 10-bit Camera video input
- One channel S-Video output
- One channel AV output
- One RS485 serial port
- One channel CAN bus interface
- 10/100Mbps network interface
- SD/MMC interface
- Multi-functional expansion interface (McBSP, IIC, McSPI, TV-OUT)
- PC104 expansion interface (GPMC Bus, MMC, USB, McSPI, UART1, Clock, HDQ)
- JTAG interface

2.3 Electric Characteristic

- SOC8200 Single Board Computer Dimensions: 96mm*90mm (8 layer PCB design)
- Input voltage: +5V
- Power Consumption: About 3W
- Working Temp.: -40℃~85℃

- Working Humidity: 20%~90%

2.4 Schematic

Please refer to the http://www.armkits.com/product/soc8200.asp

Warning: The schematic is only used for customer reference, if customers want to use it for their own development, we do not provide any technic support on it.

III Hardware specification

3.1 USB host & USB Interface

PIN	Description
1	OTG_DM
2	OTG_DP
3	OTG_BUS
4	OTG_ID
5	U1_DM
6	U1_DP
7	GND
8	POWER_USB
9	U2_DM
10	U2_DP

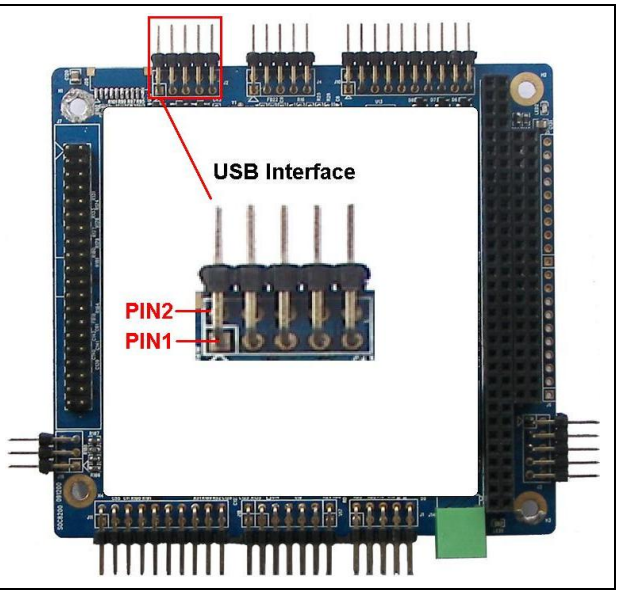

Fig3-1 USB host & USB device Interface

3.2 Network interface

SOC8200 is 10M/100M adaptive network interface

PIN	Description
1	GND
2	VCC_IO
3	TXN
4	TXP
5	GND
6	RXN
7	RXP
8	LED2/NINTSEL
9	LED1/REGOFF
10	GND

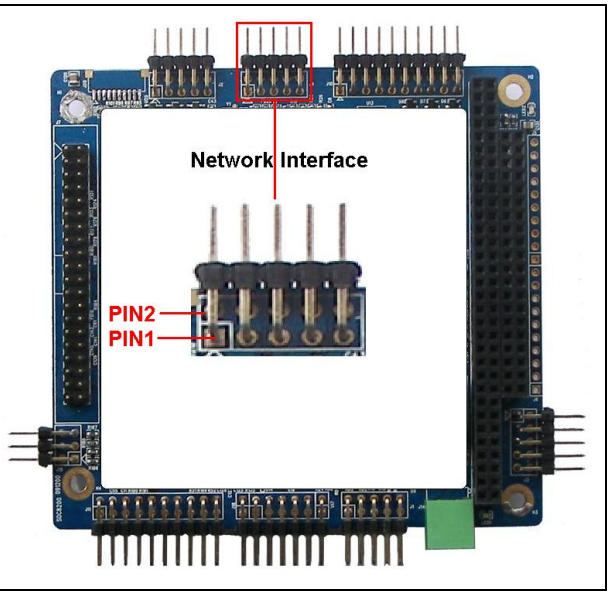

Fig3-2 Network Interface

3.3 Camera Interface

PIN	Description
1	GND
2	CAM_D0
3	CAM_D1
4	CAM_D2
5	CAM_D3
6	CAM_D4
7	CAM_D5
8	CAM_D6
9	CAM_D7
10	CAM_D8
11	CAM_D9
12	GND
13	CAM_PCLK
14	GND
15	CAM_HS
16	CAM_VS
17	VCC_IO
18	IIC3_SDA
19	IIC3_SCL
20	GND

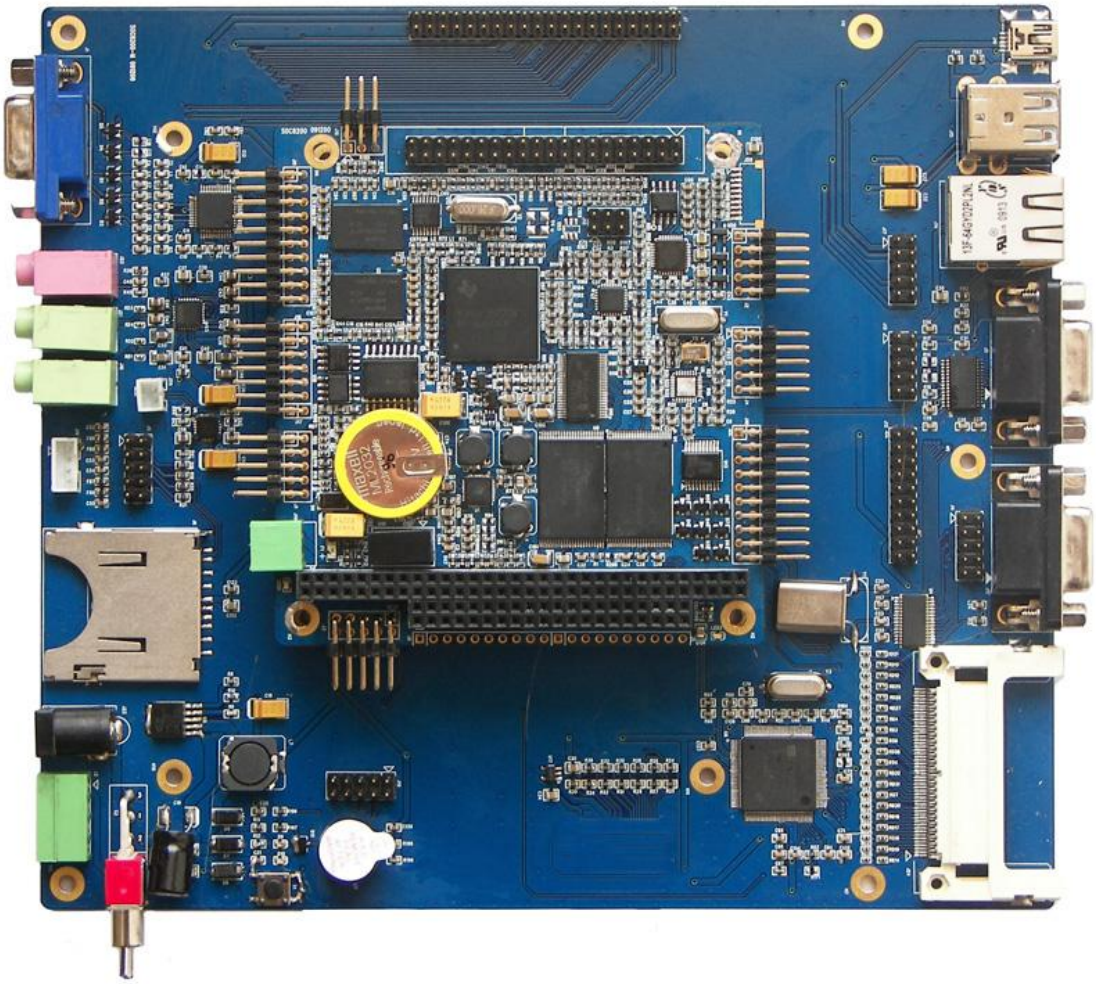
Appendix

Appendix I Expansion Board Overview

The customer can evaluate the AM3517 via SOC8200 expansion board, to experience the AM3517 processor, The customer can use **single board computer** and **function Interface board** to add the product functions, thus reducing product development cycles, achieve faster time to market.



SOC8200 Development Board

✓ **SOC8200 Expansion Board**

Audio/Video Interface

- Audio input port
- Stereo audio output port
- 15-pin standard VGA output interface

- Buzzer

Communication Interface

- One 5-wire RS232 serial port (DB9)
- One 9-wire RS232 serial port (DB9)
- One 9-wire TTL serial port (2*5pin 2.5mm pitch connector)
- Two High-speed USB 2.0 Host ports, 480Mbps
- One High-speed USB 2.0 Device port, 480Mbps
- One 10/100Mbps Ethernet port (RJ45)
- 10-bit Camera interface
- Reset button
- SD/MMC card slot
- CF card slot

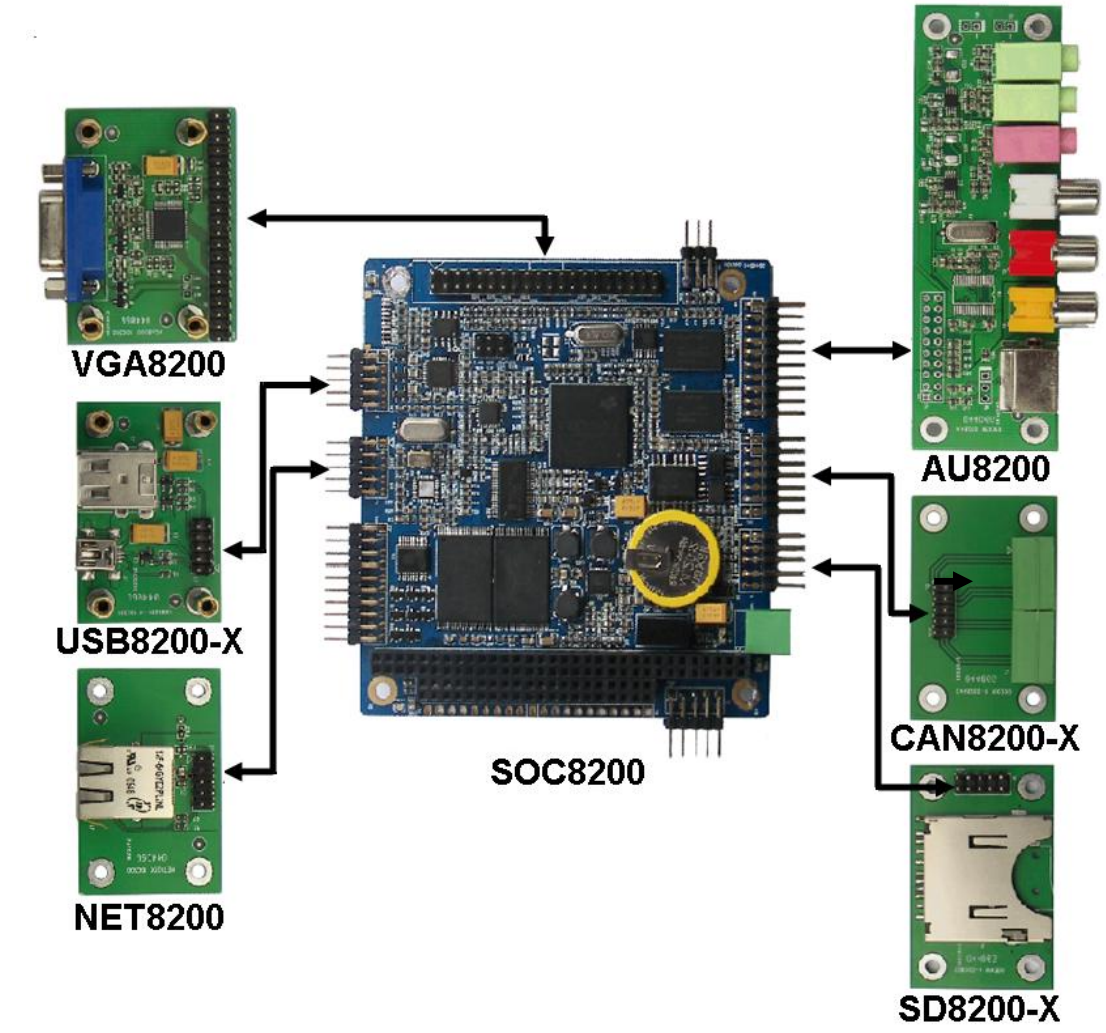
Electric Characteristic

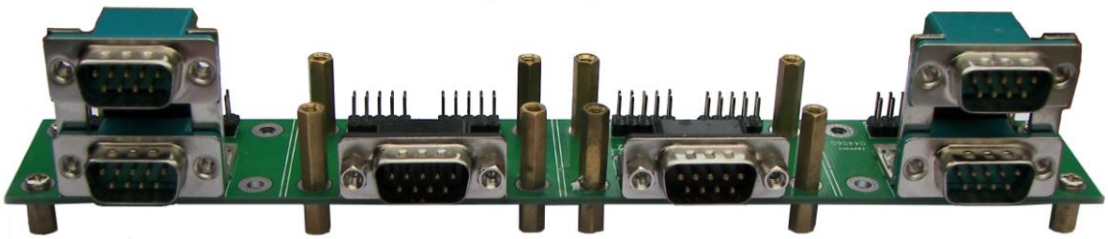
- SOC8200 Expansion Board Dimensions: 170mm*190mm

Appendix II Function Interface Board

In order to facilitate rapid customization of products, Embest launch function interface board based on SOC8200 Single Board Computer, to make the every function modulization.

Each module can be built up through the copper pillar and then through the cable connected to the SOC8200 single board computer.





ECOM-4 & ECOM-8

Remark: We do not supply function interface boards for SOC8200 retail orders except bulk orders.

Embest Technical support and Warranty Service

Embest Info&Tech Co.,LTD., established in March of 2000, is a global provider of embedded hardware and software. Embest aims to help customers reduce time to market with improved quality by providing the most effective total solutions for the embedded industry. In the rapidly growing market of high end embedded systems, Embest provides comprehensive services to specify, develop and produce products and help customers to implement innovative technology and product features. Progressing from prototyping to the final product within a short time frame and thus shorten the time to market, and to achieve the lowest production costs possible. Embest insists on a simple business model: to offer customers high-performance, low-cost products with best quality and service. The cotent below is the matters need attention for our products technical support and warranty service:

Technical support service

Embest provide one year free technical support service for all products from Embest. Technical support service covers:

- Embest embedded platform products software/hardware materials
- Assist customers compile and run the source code we offer.
- Solve the problems accurs on embeded software/hardware platform if users follow the instructions in the documentation we offer.
- Judge whether the product failure exists.

Special explanation, the situations listed below are not included in the range of our free technical support service, and Embest will handle the situation with discretion:

- Software/Hardware issues user meet during the self-develop process
- Issues happen when users compile/run the embedded OS which is tailored by users themselves.
- User's own applications.
- Problems happen during the modification of our software source code

Maintenance service clause

1. The products except LCD, which are not used properly, will take the warranty since the day of the sale:

PCB: Provide 12 months free maintenance service.

2. The situations listed below are not included in the range of our free maintenance service, Embest will charge the service fees with discretion:

   A. Can't provide valid Proof-of-Purchase, the identification label is tour up or illegible, the identification label is altered or doesn't accord with the actual products;
   B. Don't follow the instruction of the manual in order to damage the product;
   C. Due to the natural disasters (unexpect matters), or natural attrition of the components, or unexpect matters leads the defects of appearance/function;
   D. Due to the power supply, bump, leaking of the roof, pets, moist, impurities into the boards, all those reasons which lead the defects of appearance/function;
   E. User unauthorized weld or dismantle parts leads the product's bad condition, or let other people or institution which are not authorized by Embest to dismantle, repair, change the product leads the product bad connection or defects of apperance/function;
   F. User unauthorized install the software, system or incorrect cofiguration or computer virus leads the defects;
   G. Purchase the products through unauthorized channel;
   H. Those commitment which is committed by other institutions should be responsible by the institutions, Embest has nothing to do with that;

3. During the warranty period, the delievery fee which delivery to Embest should be coverd by user, Embest will pay for the return delivery fee to users when the product is repaired. If the warranty period is expired, all the delievery fees will be charged by users.

4. When the boards needs repair, please contact technical support department.

Note: Those products are returned without the permission of our technician, we will not take any responsibility for them.

Note: Embest do not supply maintenance service to LCDs. We suggest the customer first check the LCD after get the goods. In case the LCD can not run or no display, customer should inform Embest within 7 business days from the moment get the goods.

Basic notice to protect and maintenance LCD

- Do not use finger nails or hard sharp object to touch the surface of the LCD, otherwise user can't enjoy the above service.

- Embest recommend user to purchase a piece of special wiper to wipe the LCD after long time use, please avoid clean the surface with fingers or hands to leave fingerprint.

- Do not clean the surface of the screen with chemicals, otherwise user can not enjoy above service.

Value Added Services

We will provide following value added services:

- Provided services of driver develop base on Embest embedded platform, like serial port, USB interface devices, LCD screen.
- Provided the services of control system transplant, BSP drivers develop, API software develop.
- Other value added services like power adapter, LCD parts.
- Other OEM/ODM services.
- Technically training.

Please connect Embestl and get technical support:

- Support Tel:+86-755-25503401
- Fax:+86-755-25616057
- Pre-Sale consultation:market@embedinfo.com
- After-Sale consultation: support@embedinfo.com
